

Introduction to Database Systems

Presentation
Stéphane Bressan

CS2102 Aims, Objectives and Syllabus

An introductory course on relational database for computing students.

We learn **concepts** and **techniques** for the **design** and **programming** of database applications with relational database management systems.

Welcome!

Textbooks

Introduction to Database Systems

S. Bressan, B. Catania,

McGraw Hill

ISBN: 0071246509

Database Management Systems

R. Ramakrishnan, J. Gehrke Edition: 3e

McGraw Hill

ISBN: 0072465638

CS2102 Assessment

a final exam (50%)

a midterm test (20%)

a project (21%)

3 online home assignments (9%)

Project

The objective of the project is to apply the concepts and techniques learned in class for the design and programming of a Web-database application.

Deliverables

- A pre-alpha demonstration

- A preliminary design report

- An alpha demonstration

- A final report

- A demonstration of your application

Team of 4 students (no constraint on tutorial membership and option)

Success

A close-up, low-angle shot of a computer keyboard key. The key is white with the word "Success" printed in a black, sans-serif font. The key is slightly raised and angled towards the viewer. The background shows other keys, but they are out of focus and have a blueish tint. The lighting is soft, highlighting the texture of the key.
